SUMMARY

Front-end developer with 7 years building for the web and 3 years in professional teams, including two team-lead roles. Core stack: React, Next.js App Router and TypeScript in Feature-Sliced monorepos. At GGChest I led a team of 4, cut build time from ~15 minutes to under 1, and built an agentic AI workflow that helped the team deliver ~70% more tasks per sprint. Hands-on Node.js backend (NestJS, Express); Angular and Svelte in my open-source project Bitrate.

WORK EXPERIENCE

Senior Front-end Developer & Team Lead
May 2024 – Sep 2026

Aventus IT — GGChest, gaming marketplace · Warsaw / Remote

- Led a frontend team of 4 and owned architecture, standards and releases for a Next.js App Router + TypeScript monorepo (customer storefront and internal admin panel) built on Feature-Sliced Design.
- Built an agentic AI development workflow connected to Jira: subagents implement tasks end to end, engineers review and release. Result: ~70% more tasks delivered per sprint.
- Rebuilt the build pipeline: build time from ~15 minutes to under 1 minute on a growing codebase.
- Onboarded 9 engineers using written code-style standards enforced through lint rules and CI gates.
- Drove performance work: bundle-size budgets, Lighthouse-based performance testing, React render profiling and real-user Core Web Vitals monitoring.
- Set up MSW for API mocking in tests; ran the team's tech meetups (agenda and sessions) to spread new practices.

Front-end Developer & Team Lead
Mar 2023 – May 2024

Nova Developers Co.

- Led and mentored up to 4 project teams of 3–6 engineers in parallel.
- Built CRM systems, admin panels and marketing sites in React and Next.js, from architecture through release.

Front-end Developer (Layout, React)
2019 – Jan 2023

Freelance

- Delivered client websites end to end: responsive, cross-browser, accessible and SEO-friendly markup from Figma and PSD; custom WordPress themes.
- From 2021 built React applications for paying clients; on fullstack projects owned the API layer in NestJS and Express.

PROJECTS

Bitrate — open-source platform for musicians · github.com/Lordpluha/bitrate

- NestJS/Express backend and a PWA frontend with a Service Worker caching API responses; Angular and Svelte work alongside React and Next.js.

TECHNICAL SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript, HTML5, CSS3, TanStack Router, TanStack Query
State: Redux Toolkit, RTK Query, Zustand, Nuqs
Architecture: Monorepos, Feature-Sliced Design, Micro-frontends, Clean Architecture, Feature Flags
UI: Tailwind CSS, SCSS, Styled-components, shadcn/ui, MUI, Storybook, Design Systems, Figma
Testing & quality: Playwright, Jest, Vitest, React Testing Library, MSW, Zod, Sentry, ESLint, Prettier, Biome
Web platform: Accessibility, Semantic HTML, SEO, i18n, Core Web Vitals, Lighthouse, PWA, Service Workers, WebSocket, GraphQL, REST, web security (CSP, CORS, XSS, CSRF, OWASP)
Backend & infrastructure: Node.js, NestJS, Express, Prisma, TypeORM, SQL, Docker, Nginx, CI/CD, Vite, Webpack
AI tooling: Claude Code, MCP, GitHub Copilot, Codex, agentic development workflows
Also: Angular and Svelte (project experience, Bitrate); open to React Native

EDUCATION & LANGUAGES

Bachelor of Modern Web Programming and Game Development — NTU “Kharkiv Polytechnic Institute”, Sep 2023 – Sep 2027 (in progress)

CyberSecurity — KRAUSS College, 2021 – 2023

Languages: English C1 · Polish B1 · Ukrainian native · Russian native
